INDEX TO VOLUME IV

ACIDS in the ration, Influence of on the acidity of milk, 8

Acids, The volatile, and the volatile oxidizable substances of cream and experimental butter, 521

Acidity of milk, Influence of acids in the ration on the, 8

Acidity test, A rapid, for grading milk, 91

Acid test, Grading milk by, 7

Acidity, Relation of to the coagulation temperature of evaporated milk, 294

Acidity, The value of a titration test for, at the receiving platform, 536

Acidity and quality, 105

American Dairy Science Association, Annual meeting of, 158

Amino acid content, 375

Annual meeting of the American Dairy Science Association, 158

AYERS, S. HENRY, and MUDGE, COURTLAND S. Hot air sterilization of dairy utensils, 79

AYERS, S. HENRY, and MUDGE, COURTLAND S. Two organisms of a commercial lactic starter, 240

BACTERIAL content of cow's milk. The relationship between the hydrogen-ion concentration and the, 1

Bacterial count, in milk, Influence on by dirt content, 430

Bacterial counts from milk samples, The accuracy of, 39

BEAVER, HAROLD J., SCHULTZ, EDWIN W., and MARX, ALBERTA, The relationship between the hydrogen-ion concentration and the bacterial content of cow's milk, 1

Book review, 358

BOUSKA, F. W. Acidity and quality, 105

BREED, R. S., and STOCKING, W. A., The accuracy of bacterial counts from milk samples, 39

BRODY, SAMUEL, TURNER, CHARLES W., and RAGSDALE, A. C. The variation in the per cent of fat in successive portions of cow's milk, 448

Butter, experimental, The volatile acids and the volatile oxidizable substances of cream and, 521

Butter-fat content of cows' milk during a period of two days, factors affecting the total, 495

Butter, Relation between grad claimed and actual grade, 286

Butter, Yeasts and Oidia in high grade experimental, 510

Butterfat in cream, The estimation of, 32

Butterfat production, Possibility of increasing by drugs, 474

CALCIUM in feed of dairy cows, Influence of on milk yield, 185

Cattle Judge, The personal equation of the, 359

CHAMBERS, W. H., HARDING, H. A., PRUCHA, M. J., KOHMAN, E. F., WEETER, H. M. In how far is the bacterial count of milk influenced by the dirt content? 430

COLONNA, J. E. A modern creamery of the middle west, 546

COMBS, STANLEY, and CURTIS, R. S. The effect of cottonseed meal upon the growth and reproduction of cows, 334

Conformation in relation to milk producing capacity in cattle, 359
Corn stover silage versus corn silage for milk production, 29
Cost accounting, Milk, necessary records in, 486
Cotton seed as food, Historical notes on, 250
Cottonseed meal, The effect of, upon the growth and reproduction of cows, 334
Cottonseed meal, The proteins of, 375, 552
Cottonseed meal, The use of, to increase the percentage of fat in milk, 310
Cows, dairy, Influence of calcium and phosphorus in the feed on milk yield of, 185
Cow's milk, variation in the per cent of fat in successive portions of, 448
Cows, Production of, 451
Cows, The effect of cottonseed meal upon the growth and reproduction of, 334
CRAIG, SEWELL and SIEGMUND, HARRY B., The estimation of butterfat in cream, 32
Cream, The estimation of butterfat in, 32
Creamery, A modern, of the Middle West, 546
Creamery inspection data, 463
CURTIS, R. S., and COMBS, STANLEY. The effect of cottonseed meal upon the growth and reproduction of cows, 334

DAIRY industry, The biggest problem confronting our, 456
Dairy literature, Review of, 462
Dairy notes, 266, 589
Dairy produce for export, Official grading and control of, 218
Dairy products, A method for determining lime in, 453
Dairy products investigational projects carried on in 1919, 416
Dairy products session established, 355
Dairy statistics, Availability and usefulness of, 342
Dairy utensils, Hot air sterilization of, 79
DEYSHER, E. F., EVANS, F. R., and ROGERS, L. A. The relation of acidity to the coagulation temperature of evaporated milk, 294
Dirt content, In how far is the bacterial count of milk influenced by, 430
Drugs, The possibility of increasing milk and butterfat production by the administration of, 474

ERF, OSCAR. Necessary records in milk cost accounting, 486
EVANS, F. R., ROGERS, L. A., and DEYSHER, E. F. The relation of acidity to the coagulation temperature of evaporated milk, 294

FERRIS, L. W., REDFIELD, H. W., and NORTH, W. R. The volatile acids and the volatile oxidizable substances of cream and experimental butter, 521
FLEMING, R. S., and NAIR, J. H. The value of a titration test for acidity at the receiving platform, 536
FRANDSEN, J. H. Book review, 358
FRANDSEN, J. H., ET AL. Soiling versus silage for dairy cows under Nebraska conditions, 124
FRANDSEN, J. H. Open forum, 183

GOWEN, JOHN W. Studies on conformation in relation to milk producing capacity in cattle. II. The personal equation of the cattle judge, 359
Grading and control of dairy produce for export, 218
Grading milk, A rapid acidity test for, 91
Grading milk by the acid test, Influence of acids in the ration on the acidity of milk, 7

Guernsey sires, Performance in some of the leading, 95

HAMMER, B. W. New angles to the starter-maker's problem, 277
HARDING, H. A. Should we have a new milk score card? 73
HARDING, H. A., PRUCHA, M. J., KOHMAN, E. F., WEETER, H. M., CHAMBERS, W. H. In how far is the bacterial count of milk influenced by the dirt content, 430
HART, E. B., and SOMMER, H. H. Grading milk by the acid test; Influence of acids in the ration on the acidity of milk, 7
HENDRICKSON, J. W. Dairy notes, 266, 289
HENDRICKSON, J. W., ET AL. Soiling versus silage for dairy cows under Nebraska conditions, 124
HOOPER, J. J. Milk production of young cows compared with that of mature cows, 451
HULCE, R. S., MORRISON, F. B., and HUMPHREY, G. C. Corn stover silage versus corn silage for milk production, 29
HUMPHREY, G. C., HULCE, R. S., and MORRISON, F. B. Corn stover silage versus corn silage for milk production, 29
Hungarian dairy experiment station-letter, 183
Hydrogen-ion concentration and the bacterial content of cow's milk, Relationship between, 1

ICE cream mixes, Methods of calculating, 401
Ice cream, What is a fair standard for, 231
Increasing the production of a scrub herd, Value of a purebred sire in, 12
Investigational projects, 416

JUDKINS, H. F. The sampling of milk, 350

KOHMAN, E. F., WEETER, H. M., CHAMBERS, W. H., HARDING, H. A., PRUCHA, M. J. In how far is the bacterial count of milk influenced by the dirt content? 430

LACTIC starter, Two organisms of a commercial, 240
Lime, in dairy products, A method for determining, 453

McCANDLISH, ANDREW C. and OLSON, T. M. The possibility of increasing milk and butterfat production by the administration of drugs. II, 474
McCANDLISH, ANDREW, C. The use of cottonseed meal to increase the percentage of fat in milk, 310
McCANDLISH, ANDREW C. The value of the purebred sire in increasing the production of a scrub herd, 12
MACY, ICIE G. Historical notes on cottonseed as food, 250
MARX, ALBERTA, BEAVER, HAROLD J., and SCHULTZ, EDWIN W. The relationship between the hydrogen-ion concentration and the bacterial content of cow's milk, 1
MEAD, S. W., and REGAN, W. M. Factors affecting the total butterfat content of cows' milk during a period of two days, 495
MEADE, DEVOE. Performance in some of the leading Guernsey sires, 95
MEIGS, EDWARD B., and WOODWARD, T. E. The influence of calcium and phosphorus in the feed on the milk yield of dairy cows, 185
Milk, A rapid acidity test for grading, 91
Milk cost accounting, necessary records in, 486
Milk, evaporated, The relation of acidity to the coagulation temperature of, 294
Milk, grading by acid test, 7

Milk, Influence of acids in the ration on the acidity of. 8
Milk production, Corn stover silage versus corn silage for, 29
Milk production of young cows compared with that of mature cows, 451
Milk production, Possibility of increasing by drugs, 474
Milk samples, The accuracy of bacterial counts from, 39
Milk score card, Should we have a new, 73
Milk, Situation in Ontario, 114
Milk, The relationship between the hydrogen-ion concentration and the bacterial content of, 1
Milk, The sampling of, 350
Milk, The use of cottonseed meal to increase the percentage of fat in, 310
Milk, The variation in the per cent of fat in successive portions of, 448
MOJONNIER, T. A method for determining lime in dairy products, 453
MOJONNIER, T. Review of dairy literature, 462
MORRISON, F. B., HUMPHREY, G. C., and HULCE, R. S. Corn stover silage versus corn silage for milk production, 29
MUDGE, COURTLAND S., and AYERS, S. HENRY. Hot air sterilization of dairy utensils, 79
MUDGE, COURTLAND S., and AYERS, S. HENRY. Two organisms of a commercial Lactic starter, 240

NAIR, J. H., and FLEMING, R. S. The value of a titration test for acidity at the receiving platform, 536
NEVENS, W. B. The proteins of cottonseed meal. I. Amino Acid content, 375
NEVENS, W. B. The proteins of cottonseed meal. II. Nutritive value, 552
NORTH, A. C., ET AL. Soiling versus silage for dairy cows under Nebraska conditions, 124
NORTH, W. R., FERRIS, L. W., and REDFIELD, H. W. The volatile acids and the volatile oxidizable substances of cream and experimental butter, 521
NORTH, WILLIAM, R., JR., and REDDISH, GEORGE F. Yeasts and Oidia in high-grade experimental butter, 510
Notes, Dairy, 266, 589

OIDIA, yeasts and, in high-grade experimental butter, 510
OLSON, T. M., and MCCANDLISH, ANDREW C. The possibility of increasing milk and butterfat production by the administration of drugs, 474
Ontario, The milk situation in, 114
Open forum—Should we have a new milk score card, 73
Open forum, 183, 345, 456

PHOSPHORUS in feed of dairy cows, Influence of on milk yield, 185
POTTS, ROY C. Availability and usefulness of dairy statistics, 342
POTTS, ROY C. Dairy products investigational projects carried on by the agricultural experiment stations in 1919, 416
POTTS, ROY C. Dairy products section established, 355
POTTS, ROY C. The biggest problem confronting our dairy industry: can the American Dairy Science Association offer a solution for it? 456
Proteins of cottonseed meal, 375
PRUCHA, M. J., KOHMAN, E. F., WEETER, H. M., CHAMBERS, W. H., and HARDING, H. A. In how far is the bacterial count of milk influenced by the dirt content? 430
Purebred sire, the value of, in increasing the production of a scrub herd, 12

QUALITY, Acidity and, 105

RAGSDALE, A. C., BRODY, SAMUEL, and TURNER, CHARLES W. The variation in the per cent of fat in successive portions of cow's milk, 448
Records, necessary in milk cost accounting, 486
REDDISH, GEORGE F. The relation between grade claimed and actual grade of butter purchased in the retail market, 286
REDDISH, GEORGE F., and NORTH, WILLIAM, R., JR. Yeasts and Oidia in high-grade experimental butter, 510
REDFIELD, H. W., and STOCKING, W. A. Creamery inspection data, 463
REDFIELD, H. W., NORTH, W. R., and FERRIS, L. W. The volatile acids and the volatile oxidizable substances of cream and experimental butter, 521
REGAN, W. M., and MEAD, S. W. Factors affecting the total butter-fat content of cows' milk during a period of two days, 495
ROGERS, L. A., DEYSHER, E. F., and EVANS, F. R. The relation of acidity to the coagulation temperature of evaporated milk, 294
RUDDICK, J. A. Official grading and control of dairy produce for export, 218
RUDDICK, J. A. The milk situation in Ontario, 114

SCHULTZ, EDWIN W., MARX, ALBERTA, and BEAVER, HAROLD, J. The relationship between the hydrogen-ion concentration and the bacterial content of cow's milk, 1
Score card, Milk, Should we have a new, 73
Scrub herd, The value of a purebred sire in increasing the production of a, 12
SHAW, ROSCOE H. A rapid acidity test for grading milk, 91
SIEGMUND HARRY B., and CRAIG, SEWELL. The estimation of butterfat in cream, 32
Silage, corn stover versus corn silage for milk production, 29
Silage for dairy cows under Nebraska conditions, Soiling versus, 124
Sires, Performance in some of the leading Guernsey, 95
Soiling versus silage for dairy cows under Nebraska conditions, 124
SOMMER, H. H. Methods of calculating ice cream mixes, 401
SOMMER, H. H., and HART, E. B. Grading milk by the acid test; Influence of acids in the ration on the acidity of milk, 7
Starter-makers' problem, New angles to the, 277
Starter, Two organisms of a commercial lactic, 240
Statistics, dairy, Usefulness and availability of, 342
Sterilization of dairy utensils, Hot air, 79
STOCKING, W. A., and BREED, R. S. The accuracy of bacterial counts from milk samples, 39
STOCKING, W. A., and REDFIELD, H. W. Creamery inspection data, 463

TEST, titration, for acidity at the receiving platform, The value of a, 536
Titration test for acidity at the receiving platform, The value of a, 536
TURNER, CHARLES W., RAGSDALE, A. C., and BRODY, SAMUEL. The variation in the per cent of fat in successive portions of cow's milk, 448

VOLATILE acids, and the volatile oxidizable substances of cream and experimental butter, 521
